

Statement to the Membership

The Fishing Committee will administer the rules of all general fishing competitions in the following manor.

It is our intention to generate an atmosphere of friendly competitions between friends, club members and like-minded fishermen. One where we can show off our skills and boast about our achievements in a forum where it can be appreciated. It is the responsibility of the fishing committee to guide and help members to enjoy the fishing competitions. It is not our intention to ostracize members for being fowl of the rules if it is out of their control.

The fishing Committee will not administer the competition rules with an iron fist, rather it will take on a role of mentor and encourage greater participation in the fishing competitions.

That said any Member found to be deliberately cheating or has an illegal catch, or is thought to be taking advantage of the good natured position the fishing committee has adopted here, will be dealt with in an appropriate manor.

The fishing committee is working tirelessly throughout the year to promote good will and provide the membership with a schedule of fishing competitions that everyone can enjoy and be a part of, irrespective of your fishing preferences and skill level.

The fishing competitions have been engineered to accommodate all club members and to promote sustainable fishing within our local waters. We as a fishing committee openly encourage all members' feedback and will always act in the best interests of the greater membership.
